

Installing PostGIS

Mac

1. Install Homebrew on Mac
2. Install postgis using these commands:
 - `brew install postgis`
 - `brew services start postgresql@14`
 - `createdb postgres`
 - `psql -d postgres`
 - `CREATE EXTENSION postgis;`
 - `SELECT PostGIS_Version();`
- 3. Alternatively follow this [video tutorial](#)

Windows

1. Installation process [here](#)
2. Follow [this video](#) or [this article](#)
